WORK EXPERIENCE

Product Owner

MERAKI JO – Nov 2025 till Feb 2026

Key Responsibilities:

Led the delivery and operational management of a project-based technical training program focused on Vibe Coding and frontend development. Managed roadmap planning, sprint coordination, backlog organization, stakeholder meetings, QA reviews, and continuous training modifications to improve student outcomes and delivery efficiency.

Tracked KPIs including completion rate, attendance, student satisfaction, and project-based performance metrics. Coordinated one instructor and three assistants to support eight students through the successful delivery of over 40 practical projects. Structured workflows, delivery processes, and training operations while maintaining zero financial debt for the program during its first launch cycle.

Team Lead & Product Manager

Kawkab AI – Jun 2025 till Oct 2025

Key Responsibilities:

Coordinated the development and operational delivery of an LMS and AI-focused training program. Worked with developers to prioritize features, gather operational requirements, conduct testing, and support training delivery improvements.

Collaborated with a four-person team across product coordination, training operations, and technical communication. Contributed to launching a new training course within the LMS and trained instructors to deliver the program effectively. Supported cross-functional communication between technical and non-technical stakeholders throughout product delivery and training implementation.

Operations & Teaching Assistant

MERAK JO – Dec 2023 till Feb 2025

Key Responsibilities:

Supported operational workflows, technical training delivery, and student success tracking for full-stack development programs. Coordinated communication between instructors, students, and management teams while mentoring over 50 students across MERN and PERN stack projects.

Contributed to process optimization initiatives by automating operational workflows, improving system organization, writing SOPs and operational playbooks, and enhancing student success evaluation criteria to support better decision-making processes. Assisted in curriculum updates and technical documentation improvements aligned with evolving tools and technologies.
